## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of claims 1-16 and 18-20 in Paper No. 02/09/04 is acknowledged.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-16 and 18-20 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 6-7, 14, 16, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Takara et al. (US5646774).

With respect to claims 1-2, 6-7, 16, and 20, Takara show in Fig.1 and 12 a semiconductor optical amplifier 3 (col.1, l.40) for a laser cavity; an intracavity

filter 6, in the laser cavity having a filter function specifying a frequency of operation of the laser; and modulation system 2 that modulates an optical length of the laser cavity to change spectral locations of longitudinal modes of the laser cavity relative to the filter function; wherein a temperature of the system is allowed to fluctuate with ambient temperature (col.15, l.3-11) while the modulation system modulates the optical length of the laser cavity to change spectral locations of longitudinal modes of the laser cavity relative to the filter function.

With respect to claim 14, Takara disclose an isolator 4 in Fig.1.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-4 and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takara et al. (US5646774) in view of Sullivan et al. (US6466185).

With respect to claims 3-4, Takara disclose all limitations of the claims except for the quarter wave plate. Sullivan teach the quarter wave plate 104 (Fig.9). For the benefit of light polarization, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Takara the quarter wave plate as taught by Sullivan.

With respect to claim 18, Sullivan disclose the MEMS structure (col.12, 1.52-53).

With respect to claim 19, Sullivan disclose the membrane structure 92 (Fig.8).

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takara et al. (US5646774) in view of Lieberman et al. (US6650810). Takara disclose all limitations of the claim except for the gratings. Lieberman teach the gratings 56 (Fig.3). For the benefit of a laser system, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Takara the gratings as taught by Lieberman.

Claims 8-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takara et al. (US5646774) in view of Ohshima et al. (US4998256).

With respect to claims 8-10 and 13, Takara disclose all limitations of the claims except for the monitor diode. Ohshima teach the monitor diodes 18 and 21 (Fig.9). For the benefit of detecting the laser light, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Takara the monitor diode as taught by Ohshima.

With respect to claims 11-12, Ohshima show in Fig.9 a hermetic cover 43 and a window 431.

With respect to claim 15, Ohshima show in Fig.9 a focus lens 13 and an optical fiber pigtail 14.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.**

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
